**2020 Woody Plant Evaluations
at the Colorado State University Arboretum, Fort Collins, CO**

Scientific Name: Acer platanoides **Variety:** -0-
Cultivar: Summershade **Family:** Aceraceae **Tsnum:** 87080
Common Name: Summershade Norway Maple
Source: J. Frank Schmidt and Son Co **Quantity observed:** 1 **Location:** B14

Observation Date of Plant: 8/31/2020

Plant Habit: Irregular to round

Plant Height: 30-35 ft.

Plant Width: 30-35 ft.

Current Seasons Growth: 3-6 in.

Foliage Color: Medium green

Bark Characteristics: Unimportant

Plant Summer Texture: Medium

Aesthetic Plant Quality: Fair to poor

Landscape Uses: Residential street, large shade tree

Overall Plant Health: Poor

Fruit Present: None

Fruit Color:

Insect Pests:

Pest Severity:

Plant Disease: Canker

Disease Severity: Severe injury

Cultural Problems:

Nuisances:

Recommended: No

Comments on plant: Growth habit deformed by storm damage. Canker in trunk killed 25% of original central leader a few years ago and probably causing large split in bark down the rest of the tree. Appears to be in a irreversible decline.

Observation Date of Flowers: 4/26/2006

Flower Color: Yellow/green

Flower Type: cluster

Flower Effect: Fair

% of Flower Coverage: 50-70%

Bloom Stage: Flowers open

Comments on Flowers: Not a bright enough yellow to be showy - blends in with emerging foliage.

Scientific Name: Acer saccharum **Variety:**
Cultivar: Heartland **Family:** Aceraceae **Tsnum:** 06003
Common Name: Autumn Faith Sugar Maple
Source: Femrite Nursery Company **Quantity observed:** 1 **Location:** SC02-4

Observation Date of Plant: 9/25/2019
Plant Habit: Upright oval
Plant Height: 12-18 ft.
Plant Width: 8-12 ft.
Current Seasons Growth: 10-20 in.

Foliage Color: Medium to dark green
Bark Characteristics: Unimportant
Plant Summer Texture: Medium
Aesthetic Plant Quality: Good
Landscape Uses: Residential street, specimen

Overall Plant Health: Good
Fruit Present: None
Fruit Color:
Insect Pests:
Pest Severity:
Plant Disease: Canker
Disease Severity: Severe injury on one tree but not active now
Cultural Problems:
Nuisances:
Recommended: Marginal
Comments on plant: Planted in 2008. Canker on trunk killed the top one third of plant but remainder would look good if dead wood is removed.

Nuisances:

Recommended: Yes

Comments on plant: Planted in arboretum in 2003. Fruit looks very similar to a pie cherry but half as big. It is an interesting feature but is often hiding under foliage so not too showy. Attractive growth habit - more compact than most Lonicera.

Fall Color or Fruit: Fall color

Aesthetics: Good

Fall Color: Red/purple

Date of observation: 10/6/2008

Persistence: 1-2 weeks

**2020 Woody Plant Evaluations
at the Colorado State University Arboretum, Fort Collins, CO**

Scientific Name: Malus x **Variety:** -0-
Cultivar: Van Eseltine **Family:** Rosaceae **Tsnum:** 78087
Common Name: Van Eseltine Flowering Crabapple
Source: J. Frank Schmidt and Son Co **Quantity observed:** 2 **Location:** E0

Observation Date of Plant: 9/28/2019
Plant Habit: Vase but becoming wider and open
Plant Height: 15-20 ft.
Plant Width: 15-20 ft
Current Seasons Growth: 6-12 in.

Foliage Color: Medium green
Bark Characteristics: Intermediate importance
Plant Summer Texture: Medium
Aesthetic Plant Quality: Fair
Landscape Uses: Residential street, specimen, small/confined areas

Overall Plant Health: Fair
Fruit Present: Few fruit
Fruit Color: Green turning to red
Insect Pests:

Pest Severity:
Plant Disease:

Disease Severity:
Cultural Problems:

Nuisances: Moderate suckering
Recommended: Yes

Comments on plant: Vigor is low in regard to new growth but canopy is full. Nice growth habit for narrow areas. Mild chlorosis - may do better if not on edge of arboretum where irrigation is less uniform.

Observation Date of Flowers: 4/29/2006
Flower Color: Pink
Flower Type: Cluster
Flower Effect: Excellent
% of Flower Coverage: 80-100%
Bloom Stage: Flowers open

Comments on Flowers: Double petals. Buds are dark pink and very showy.

Scientific Name: Zelkova serrata **Variety:**
Cultivar: Musashino **Family:** Ulmaceae **Tsnum:** 99010
Common Name: Musashino Zelkova
Source: J. Frank Schmidt and Son Co **Quantity observed:** 3 **Location:** SC6-3, 11-1, 12-01

Observation Date of Plant: 8/21/2020

Plant Habit: Vase

Plant Height: 12-17 ft.

Plant Width: 5-7 ft.

Current Seasons Growth: 6-12 in.

Foliage Color: Medium to dark green

Bark Characteristics: Unimportant

Plant Summer Texture: Medium

Aesthetic Plant Quality: Fair to poor

Landscape Uses: Residential street, Specimen

Overall Plant Health: Fair

Fruit Present: None

Fruit Color:

Insect Pests:

Pest Severity:

Plant Disease: Canker

Disease Severity: Moderate to severe damage

Cultural Problems:

Nuisances:

Recommended: No

Comments on plant: Planted in 2003. Appears hardy for this area but susceptible to canker.

**2020 Woody Plant Evaluations
at the Colorado State University Arboretum, Fort Collins, CO**

Scientific Name: Ziziphus jujube **Variety:** -0-
Cultivar: -0- **Family:** Rhamnaceae **Tsnum:** 78013
Common Name: Common Jujube
Source: Knox City Plant Material **Quantity observed:** 1 **Location:** E7

Observation Date of Plant: 9/28/2020

Plant Habit: Upright oval

Plant Height: 18-24 ft.

Plant Width: 20-25 ft

Current Seasons Growth: 12-18 in.

Foliage Color: Medium green, very glossy

Bark Characteristics: Unimportant

Plant Summer Texture: Fine

Aesthetic Plant Quality: Good

Landscape Uses: Specimen, large shrub for back of border, small tree

Overall Plant Health: Good

Fruit Present: Few fruit

Fruit Color: Brown/Orange

Insect Pests:

Pest Severity:

Plant Disease:

Disease Severity:

Cultural Problems:

Nuisances:

Recommended: Yes

Comments on plant: Foliage is drab "Army green" but very glossy. Has had die back during a very cold winter about 1990 but had no problems during severe cold in winters since then. Growth habit deformed by early fall snow on 9.8.20.

Observation Date of Flowers: 7/23/2003

Flower Color: Yellow

Flower Type: Cluster

Flower Effect: Poor

% of Flower Coverage: 26-50%

Bloom Stage: Flowers open

Comments on Flowers: Flowers are too tiny to be showy.
